International Journal of

SYSTEMS SCIENCE

The Theory and Practice of Mathematical Modelling, Simulation, Optimization and Control in relation to biological, economic, industrial and transportation systems

VOLUME 12

Editor: B. Porter

University of Salford, U.K.

Editorial Board:

J. W. Bandler - - Hamilton
S. Barnett - - - Bradford
J. C. G. Boot - - Buffalo
R. C. Conant - - Chicago
F. H. George - - Brunel
R. Gorez - - - Louvain
L. T. Grujic - - Belgrade
S. C. Gupta - - Dallas
C. H. Houpis - - Ohio
G. J. Klir - - - Binghamton
M. E. Merchant - Cincinnati
J. Peklenik - - - Ljubljana
R. Perret - - - Grenoble
R. Rosen - - - Halifax
J. K. Sengupta - Santa Barbara
Y. Z. Tsypkin - - Moscow
J. L. Willems - - Ghent

Subscription Information

USA, Canada and Mexico (air freight): annual subscription (payable in advance), $380·00; per part $34·00 (surface post paid). Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York 11431. USA Postmaster: Send address changes to *International Journal of Systems Science*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. US subscribers should send order and cheque (in favour of Taylor & Francis Ltd) to Account 04 810 879 Bankers Trust Company, P.O. Box 9137, Church Street Station, New York, N.Y. 10049.

Japan (accelerated surface post): apply to exclusive agents, Kinokuniya Company Ltd, Odakyu West-Shinjuku Building, 47–1 Hatsudai 1-chome, Shibuya-ku, Tokyo 151. Telex 2322535.

FR Germany (surface post): annual subscription (payable in advance), DM 560·00; per part DM 52·00. Subscribers in FR Germany should send order and cheque (in favour of Taylor & Francis Ltd) to Account No. 073/6686, Deutsche Bank AG, BLZ 500 700 10, Postfach 2623, Rossmarkt 18, 6000 Frankfurt/Main 1.

UK and the rest of the world (surface post; accelerated surface post to Australasia; air freight to India): annual subscription (payable in advance), £127·00; per part £12·00 (surface post paid).

Published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Telex 858540.

Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

© 1981 Taylor & Francis Ltd. ISSN 0020–7721.

CONTENTS OF VOLUME 12

NUMBER 1

Algorithms for determining equilibrium points in *N*-stage voting games
By R. L. KASHYAP and R. MUKUNDAN 1

Use of matroid theory in operations research, circuits and systems theory
By M. IRI and S. FUJISHIGE 27

Quantitative synthesis of uncertain non-linear feedback systems with non-minimum phase inputs
By I. HOROWITZ 55

Optimal control of a complex of independent operations
By E. NOWICKI and S. ZDRZAŁKA 77

Methods of parametric non-linear programming
By H. MINE, M. FUKUSHIMA and Y.-J. RYANG 95

Stability of large-scale hereditary systems with infinite retardations
By A. S. C. SINHA 111

Convergence of least squares identifiers of time series with martingale difference and binary white Markov generating processes
By J. GROSSPIETSCH and D. GRAUPE 119

Optimal classification of failures in a two-unit series system
By A. KUMAR and V. B. KAPOOR 127

NUMBER 2

A solution procedure for the hierarchical coordination of constrained optimizing systems
By J. FORTUNY-AMAT and J. TALAVAGE 133

Optimal bang-bang control of partially observable stochastic systems
By Y. YAVIN and G. REUTER 147

Determination of the state transition matrix of exponentially varying systems: algebraic methods
By A. DERVIŞOĞLU and I. C. GÖKNAR 163

A digital simulation technique for parameter optimization in a non-linear avionic servosystem
By V. Y. TAWFIK, C. MORGAN and J. H. WILLIAMS 175

Constrained system perturbation analysis
By J. A. GIBSON and M. A. HAMILTON-JENKINS 195

Analysis of estimation errors in the identification of non-linear systems
By S. Y. Fakhouri, S. A. Billings and C. N. Wormald 205

Some probability distributions related to arrival and resupply of requisitions at the depot of a two-echelon inventory system
By K. Shanker 227

Adaptive locally optimal control
By G. K. Kel'mans, A. S. Poznyak and A. V. Chernitser 235

Policy evaluation in the dynamic input–output model
By A. Arbel 255

Correspondence:
A note on 'Optimal control of a class of unconstrained bilinear systems'
By G. Gopalakrishnan Nair 261

NUMBER 3

A technique and a system structure for on-line activation moments determination for steady-state optimization
By A. Gościński and K. Zieliński 263

Determination of the state transition matrix of exponentially varying systems: canonical form methods
By I. C. Göknar and A. Dervişoğlu 277

A non-linear stochastic model for the machine interference problem
By K. Karmeshu and N. K. Jaiswal 293

A computer-aided method for the factorization of matrix polynomials
By L. S. Shieh and N. Chahin 305

Optimal filtering and smoothing algorithms for linear distributed-parameter systems with pointwise observation
By K. Watanabe 325

An alternative approach to the derivation of distributed-type partitioned filters
By K. Watanabe 351

Optimal tracking via polynomial matrix equations
By M. Šebek 357

An approach for improved modal control of multi-input multi-output discrete time systems
By A. K. Mahalanabis, S. Varshney and N. K. Sinha 371

Pole assignment using matrix generalized inverses
By V. Lovass-Nagy, M. R. O'Kennon and G. Rabson 383

NUMBER 4

Deadbeat control in multivariable non-linear time-varying systems
By T. KACZOREK 393

Eigenvalue assignment of two-dimensional systems using PID controllers
By P. N. PARASKEVOPOULOS and O. I. KOSMIDOU 407

Structural stability of low-order system dynamics models
By J. ARACIL 423

Analysis and optimal control of linear systems via single term Walsh series approach
By K. R. PALANISAMY 443

Simple models for integrated optimization and parameter estimation
By J. E. ELLIS and P. D. ROBERTS 455

Design of a discrete adaptive observer based on Lyapunov's direct method
By S. TAMAKI, S. OMATU, A. KIKUCHI and T. SOEDA 473

Controllability of two-input, discrete time bilinear systems
By P. HOLLIS and D. N. P. MURTHY 485

A minimum Bayes risk approach to optimal portfolio choice
By W. T. LIN 495

A new approach for fixed point smoothing in linear distributed parameter systems
By J. WARRIOR and N. VISWANADHAM 511

Special matrix solution for functional differential systems with infinite delays
By A. S. C. SINHA 519

NUMBER 5

Reduced-order feedback law implementation for 2D digital systems
By P. STAVROULAKIS and P. PARASKEVOPOULOS 525

Quantitative synthesis of feedback systems with uncertain non-linear multivariable plants
By I. HOROWITZ and M. BREINER 539

An optimization problem related to the regulation of influent nutrients in aquatic ecosystems
By T. MATSUMURA and Y. SAKAWA 565

Estimation and control for a class of non-linear stochastic systems
By Y. YAVIN and M. FRIEDMAN 587

An application of interpretive structural modelling to analyse preference structure in multiobjective dynamic environmental–economic systems
By H. TAMURA and O. NARAI 601

Heavy traffic queue with stochastic arrival and service rates
By K. KARMESHU and N. K. JAISWAL 615

Analysis of piecewise constant delay systems via block pulse-functions
By W.-L. CHEN and B.-S. JENG 625

Linear feedback system identification via block-pulse functions
By C. P. KWONG and C. F. CHEN 635

System identification via block-pulse functions
By K. R. PALANISAMY and D. K. BHATTACHARYA 643

Modelling and reduction of a biological system
By R. N. MISHRA 649

Correspondence:
A note on 'Parameter adaptive control of stochastic distributed systems'
By S. G. TZAFESTAS 655

NUMBER 6

Parameter estimation for auto-regressive systems with missing observations—Part II
By P. B. MCGIFFIN and D. N. P. MURTHY 657

A unified approach to discrete-time distributed parameter estimation by the least-squares method
By S. OMATU and J. H. SEINFELD 665

Interactive multiobjective reliability design of a standby system by the sequential proxy optimization technique (SPOT)
By M. SAKAWA 687

Microprocessor-based estimation of oxygen utilization in the activated sludge wastewater treatment process
By A. HOLMBERG 703

Hierarchical control of distributed-parameter systems using Stackelberg policies
By S. G. TZAFESTAS 719

The convergence properties of block-pulse series
By C. P. KWONG and C. F. CHEN 745

On the cheating problem in Stackelberg games
By R. P. HÄMÄLÄINEN 753

On non-preemptive strategies for stochastic scheduling problems in continuous time
By K. D. GLAZEBROOK 771

NUMBER 7

Analysis of a symmetrically stabilized three-dimensional oscillator and some implications
By B. Z. KAPLAN 783

An alternative approach to non-linear filtering
By Y. YAVIN 795

Lyapunov-like solutions for stability problems of the most general stationary Lurie–Postnikov systems
By L. T. GRUJIĆ 813

On Markov chains generated by markovian controlled Markov systems: Structural stability
By Y. KOMOTA and M. KIMURA 835

Control and estimation algorithms for physico-chemical models of pH-processes in stirred tank reactors
By P. JUTILA and P. J. ORAVA 855

Manipulation of multidimensional polynomials
By S. E. REYER 877

Block pulse series analysis of scaled systems
By W.-L. CHEN 885

Sub-optimal control with observer of a two-lane highway traffic flow
By G. JUMARIE 893

NUMBER 8

Matrix factorization and Chandrasekhar equations techniques in the design of linear quadratic optimal control systems
By R. GOREZ 907

Non-linear perturbations of dynamical systems with bounded inputs
By S. P. BANKS 917

Stochastic properties of compartment models
By R. J. MULHOLLAND and R. J. WEIDNER 927

On stability in non-cooperative duopolistic markets with satisficing behaviour
By J. R. CHARNETSKI 937

Kalman type filter for models with stochastic regressors and applications to econometric models
By H. RUSKEEPÄÄ and E. UUSIPAIKKA 949

Chebyshev approximation algorithm for linear inequalities and its applications to pattern classification
By N. N. ABDELMALEK 963

Bilateral exponential smoothing of time series
By N. Ishii, A. Iwata and N. Suzumura 977

A generalized proximal point algorithm for certain non-convex minimization problems
By M. Fukushima and H. Mine 989

Multifunctional deadbeat observers for a class of bilinear systems
By T. Hinamoto and F. W. Fairman 1001

Time-domain simplification of scalar unstable systems
By A. S. Rao and S. S. Lamba 1015

Corrigendum 1029

NUMBER 9

A method for decomposing mixed-integer linear programming problems with angular structure
By N. Sannomiya and M. Tsukabe 1031

A computational method for convex optimal control problems involving linear hereditary systems
By K. L. Teo, Z. S. Wu and D. J. Clements 1045

An alternative approach to non-linear filtering: jump process observations
By Y. Yavin 1061

Sub-optimal feedback control of large-scale systems using the boundary layer method
By H. Kando and T. Iwazumi 1083

Synthesis of a control system for a single-input multiple-output plant
By M'. M. Breiner 1111

Remarks on a maintenance policy for machines subject to intermittent failure
By K. H. Wickwire 1125

Transfer function factorization of SISO 2-D systems using state feedback
By P. N. Paraskevopoulos and B. G. Mertzios 1135

A comparison between the method of inequalities and other techniques in control systems design
By A. M. Dahshan 1149

A perturbation method for sub-optimal feedback control of bilinear systems
By D. J. Bell and Q. Ye 1157

NUMBER 10

Singular perturbation methods in the design of tracking systems incorporating high-gain error-actuated controllers
By B. Porter and A. Bradshaw 1169

Singular perturbation methods in the design of tracking systems incorporating fast-sampling error-actuated controllers
By A. BRADSHAW and B. PORTER 1181

Singular perturbation methods in the design of tracking systems incorporating inner-loop compensators and high-gain error-actuated controllers
By B. PORTER and A. BRADSHAW 1193

Singular perturbation methods in the design of tracking systems incorporating inner-loop compensators and fast-sampling error-actuated controllers
By A. BRADSHAW and B. PORTER 1207

A multisectoral stochastic optimal control model for the U.K. to derive future energy policies
By D. R. BASU 1221

A database-aided simulator for large distribution nets
By D. SINGER, G. BOGNÁR, J. BOROSSAY and J. ELEK 1261

NUMBER 11

Self-tuning control of a class of multivariable non-linear systems
By K. ANBUMANI, L. M. PATNAIK and I. G. SARMA 1273

An abstract setting for non-linear distributed multi-pass processes
By S. P. BANKS 1287

Algorithms for solvents and spectral factors of matrix polynomials
By L. S. SHIEH, Y. T. TSAY and N. P. COLEMAN 1303

On Levy's identification, its generalization and applications
By K. M. TAO and P. ZUNDE 1317

Pragmatic aspect of fuzzy programming
By O. O. OGUNTADE 1335

Determination of specific consumption of raw materials and energy in complex chemical plants
By F. MADRON and V. VEVERKA 1351

Dividend policy, liquidity needs, and the equilibrium valuation of shares
By J. A. SCHNABEL 1365

On shortest-path algorithms in the topological design of computer networks: a comparative study
By I. M. SOI and K. K. AGGARWAL 1379

Sensitivity analysis of time-delay systems
By M. KODA 1389

NUMBER 12

Causal ordering and the symmetry problem of basic linear systems
By Y. TAKAHARA, B. NAKANO and H. KUBOTA 1399

Bang–bang partially observable feedback strategies for a rendezvous problem
By Y. YAVIN 1417

Optimal measurement problem for a stochastic distributed parameter system with movable sensors
By K. NAKANO and S. SAGARA 1429

Performance of identification techniques applied to uncertain dynamic systems
By S. A. SHEHABI and P. D. ROBERTS 1447

Optimization of feedback systems with constrained information flow
By A. E. YANCHEVSKY and V. J. HIRVONEN 1459

A new continuous model for job-shop scheduling
By E. J. ANDERSON 1469

Exact model matching, polynomial equation approach
By V. KUČERA 1477

Stabilization of a class of linear time-delay systems
By A. THOWSEN 1485

Output feedback matrices in the presence of direct feedthrough
By L. R. FLETCHER 1493

Author index (with titles) 1497
